

Desty Order Open API - Sample

Documentation: <https://api.desty.app>

Base URL: <https://api.desty.app>

Mapping:  Desty Open API Mapping

List Order

API to retrieve multiple order information from Desty Omnichannel. The information provided is not as complete as the Order Detail. Use List Order API to retrieve orderId then subsequently request GET Order Detail API.

Endpoint

POST /api/order/page

API Request Parameters

Parameter	Type	Description
platform optional	string	Marketplace name. lazada, tokopedia, shopee, tiktok, blibli, zalora, destyStore, destyPos
startDate optional	number	Order create time (Start time) using unix timestamp in milliseconds
endDate optional	number	Order create time (Finish time) using unix timestamp in milliseconds
status optional	string	Order status: Unpaid, New_Orders, Ready_To_Ship, Shipping, Completed, Cancellations, Returns
pageNumber optional	integer	The number of the order pages. One pageNumber contains 500 pageSize.
pageSize optional	integer	The number of orders within a page. Already set to 500 by default.
